

WATER MAIN BREAK UPDATE – AUGUST 30, 2010 9:30PM

We have located the source of the water main break affecting the Consolidated Water District. We estimate that partial pressure will be restored by morning.

Residences are still advised to boil water for at least one minute until further notice.

If you or anyone you know is homebound, please contact the Water Department at 666-7855 and leave us name, address and phone number. After hours, please contact the Police Department on 241-3111 if you have a water emergency.

If you need water, water tanks are located at the end of Cottage Terrace, in the wide section of Lakeside Drive and in the parking lot at 425 Cherry Street to fill water bottles and jugs until the service is fully restored. Bring empty containers with you.

The next update will take place tomorrow morning.
